## Advanced Technology Video (ATV) Releases NEW 3MP Vandal Dome with Motorized Lens

Coppell, TX – December 7, 2016 – [Advanced Technology Video](#) (ATV), a leading provider of innovative video surveillance solutions since 1983, announces the release of a new professional, motorized lens vandal dome camera, **IPVD3RWI**, as its newest addition to the [ATV IP Series](#) product line.

The new 3MP vandal dome camera features a remote focus and zoom, 2.8~12mm motorized vari-focal lens, which eliminates the need for manual hands-on fine tuning. The **IPVD3RWI** uses a Sony Starvis CMOS sensor with progressive scanning, which delivers exceptional 2048 x 1536 resolution video images. The camera has 36 IR LEDs for a night-time viewing range of 115-ft and 3D-DNR which works to reduce noise and motion blur.

Other features of the **IPVD3RWI** include the Corridor / Aisle View orientation function, True Day/Night, Wide Dynamic Range, Two-Way Audio, Advanced Intelligent Health Monitoring (AIHM) and powerful video analytic functions. In addition, the camera is IP66 and IK10 rated, supports onboard storage with a Micro-SD card slot and allows power options of PoE or 12VDC.

*“ATV is always excited to release new cameras and this is no exception. The new IPVD3RWI is a full featured, professional-grade vandal dome with motorized lens allowing remote focus – all at an exceptional value”, says Keith Shaver, ATV’s VP of Sales and Marketing.*

As with all ATV IP cameras, ONVIF Profile S compliance is guaranteed and is complemented with ATV’s powerful ATVision IP® Remote Management Software featuring video monitoring, playback, recording, setup, PTZ control, system up-grade, MAP integration and multi-site system health monitoring.

**About Advanced Technology Video:** Advanced Technology Video has been a force in the security business since 1983. Since then, we’ve delivered products with unmatched reliability and value to the security industry. Today we’re stronger than ever, with a complete lineup of CCTV products that set industry standards for dependability and support.
