ATV-Next Level Security Systems exhibiting at NACDB Annual Member Meeting September 26

Coppell, TX – August 28, 2017 – [ATV-Next Level Security Systems](#) (ATV-NLSS), a leading provider of innovative integrated security solutions, announces it will be exhibiting at the [National Association of Church Design Builders](#) (NACDB) Product Expo next month. The Product Expo will be held during the Annual Member Meeting on September 26, 2017 at the Arlington Convention Center in Arlington, TX. The not-for-profit NACDB organization was founded in 2002 with the mission “... to connect like-minded firms by educating and equipping them to serve and provide resources to faith-based markets and customers.” NACDB members show churches the different building methods, best practices, and ways they might be able to save money and connect to their board approved vetted members from across the country.

ATV-NLSS is actively engaged with faith-based facility security system designs and can provide system solutions ranging from a basic, easy-to-operate video surveillance system to a more advanced, integrated security system for church and school campuses. [ATV-NLSS IP-based security management platform](#) is a completely unique security solution that integrates video management, access control, intrusion, video analytics and managed services into a single Gateway appliance.

Additionally the NLSS Gateway is a powerful network appliance that collects data from all the various subsystems and automatically transforms it into a sophisticated event management system, providing users with a comprehensive view of security operations. Video, access, intrusion, system health events and more can be linked to specific actions or automatically directed to send email or text notifications. Because there is no software to install, the NLSS Gateway is a true browser-based solution that can be accessed from any Web enabled device.

With regional and national support, ATV-NLSS provides the best customer service and technical support available anywhere. “So take a good look at all we have to offer your church, daycare, K-12 school, facility or campus,” says Keith Shaver, Vice President of Sales and Marketing. “It’s clear that whatever the needs or the application, ATV-NLSS can offer a custom solution to fit your requirements”.

About ATV-Next Level Security Systems: ATV-NLSS, a force in the security industry since 1983, has been delivering solutions with unmatched reliability and value ever since. Today we’re stronger than ever, with a complete lineup of video and integrated security products that set industry standards for dependability and support. Our full line of cameras, network appliances and other devices are loaded with features you won’t find anywhere else at the same price. And we back those products with the best customer service and technical support available anywhere.

Security without compromise
